POS Solutions

Maclocks®
.COM

The simple design of the SLIDE POS line of enclosures makes them the easiest way to deploy iPads as a POS solution.

What's in a name? SLIDE references the way you seal the enclosure with the top bezel sliding on and the sliding of a credit card to complete a successful sale. Our SLIDE on and off design make deploying an iPad POS system quick and easy with minimal assembly required.

Every SLIDE enclosure has been designed with versatility in mind giving you the ability to find the solution that fits your environment and not having to re-work your space to fit the enclosure.

SLIDE for the iPad and SLIDE M for the iPad Mini are available in 7 different mounting options and several colors with custom designs available on special request.

The SLIDE enclosures have been designed with open access to the audio jack and 30 Pin/ Lightning connector allowing it to be compatible with most card reader varieties.

We standardized the enclosure dimensions to make your decision simple, all you need to do is select your mounting option.

SLIDE M ENCLOSURE DIMENSIONS
Length: 8.07 inches
Width: 8.66 inches
Depth: 1.18 inches
Compatible with iPad Mini

SLIDE ENCLOSURE DIMENSIONS
Length: 9.64 inches
Width: 9.64 inches
Depth: 1.18 inches
